

InSite® ACID-FREE

ACID-FREE PAPER-FACED FOAMBOARD

InSite® Acid-Free was created for the high-end requirements of preservation mounting and framing and is a highly recommended solution for photographers and artists who require a backing that will help preserve their artwork for long term display or storage.

BENEFITS:

- Offers two mounting surfaces, both free from damaging pollutants and harmful gases.
- Complies with PAT Standards
- Acid-Free paper liner pH values ranging from 7.5 - 9.5 and buffered with 3 - 5 % calcium carbonate reserve.
- Liners are 100% High Alpha Cellulose virgin pulp, free from ground wood and/or post consumer materials.
- Our Reveal® foam center is engineered to be highly warp resistant to retain its thickness during mounting.
- Available in natural white.

IDEAL FOR:

- Preservation mounting and framing
- Long-term display and storage
- Fine art and photography
