Resilient®
Soft Touch Graphics Board

Frequently Asked Questions

1. **Can Resilient® be used for sound proofing applications?**

   a. Currently no; formal testing is pending.

2. **Can I purchase just the core, without facers?**

   a. Yes, on a case-by-case basis.

3. **Can the product be purchased in cartons?**

   a. Yes, Resilient® will be available in cartons within 30-60 days.

4. **Is the product available in white or other colors?**

   a. Not yet, but we are working toward providing other color core options.

5. **What is the fire rating on Resilient®?**

   a. This product in nature is highly flammable. Formal testing is pending.

6. **What glue/adhesive can be used to adhere Resilient® to itself?**

   a. We recommend hot melt EVAs or solvent-based urethane adhesives.

   b. Example: 3M™ Super 77™ Multipurpose Spray Adhesive

7. **How can I cut Resilient®?**

   a. Please see cutting guidelines on our website – **Resilient Cutting Guidelines**.

8. **What is the best adhesive tape to mount Resilient® to walls?**

   a. We recommend gel tape/Nano Tape. 3M Command™ strips are safe to use depending on size and wall texture.

9. **Is Resilient® available in thinner gauges?**

   a. Thinnest commercially available is ½" at this time.

10. **Can you produce Resilient® with different surfaces?**

    a. Yes, as a making SKU. Please reach out to your BDL for details and MOQs.

11. **Is Resilient® waterproof?**

    a. Yes, with standard styrene facers only. Different surfaces may alter this feature.

12. **Is Resilient® recyclable?**

    a. No.
